

# GitHub Direct Link Notes

## 1. Image File (JPG, PNG, etc)

Step 1: Upload image to GitHub repository.

Step 2: Click on image file after upload.

Step 3: Copy URL and replace:

github.com => raw.githubusercontent.com

blob/main/ => main/

Example:

Original: <https://github.com/username/repo/blob/main/image.jpg>

Direct Link: <https://raw.githubusercontent.com/username/repo/main/image.jpg>

## 2. HTML File (Live Web Page)

Step 1: Upload your HTML file to GitHub repository.

Step 2: Go to Settings > Pages > Set source branch to 'main' and save.

Step 3: Use the following link format:

<https://username.github.io/repository-name/filename.html>

If filename is 'index.html', use:

<https://username.github.io/repository-name/>

Example:

HTML File: sigma.html in repo 'my-image'

Live Link: <https://sandeepku7862.github.io/my-image/sigma.html>
